Saving the application data locally in the Database using MySQL

Educational Background

Jul 2013-May 2017   **B.E. (Computer Science)**

 Lovely Professional University, Jalandhar

Projects

Title: VISITOR SIGNIN (Only for iPad's)
App URL : https://apps.apple.com/us/app/visitor-signin/id1449261546?ls=1
Objective: This app was made for only one reason i.e. taking feedbacks from the visitors who are visiting the museums in the US.

Title: GRT NETWORK
Objective: To view videos related to the trampoline. Users can either purchase the playlist or can play free videos of trampoline action. Also they can download the video at some particular charges. Purchase can be done using in-App purchase using apple pay.

Title: eMembership Card
App URL : https://apps.apple.com/us/app/emembership-card/id1161384548?ls=1
Objective: This app contains the list of different Museums in the US where the users can buy membership to the particular museum and can download their respective museum's card and save it to their wallet for future use. They'll receive notifications of the activities of the museum whether it is related to the use of their card or any other exciting offers from the museum.

Title: Script Linx
Objective: This app was made for both iPhones and iPads with different functionality in both of the device. The main purpose of the app was to schedule appointments for Medical Representatives with the Doctors and there is a Mediator (in this case admin) who schedules the meetings. The MR has his own login functionality where he can select the type of medicine which he sells and the request is directly sent to the Mediator. Where the Mediator checks in with the doctor for his free time and books that slot for the MR. As soon as the Mediator selects the slot, notification is directly sent to the MR telling him whether the meeting is scheduled or not, if its scheduled the notification contains the date and time.

Title: CRx
App URL: https://apps.apple.com/us/app/crx-by-hcf-compliance/id1479193433?ls=1
Objective: This app was made for inspection of the different hospitals in the US. It provides hospitals with physical environment risk management and compliance solutions and tools in order for their facility's inspections, rounds, drills, and tasks to maintain compliance, resulting in successful surveys.

Title: Omaha Children's Museum
App URL: https://apps.apple.com/us/app/omaha-childrens-museum/id1369141763?ls=1
Objective: This app lets users buy membership of museum and can download their card and save it to their wallet for future use. They'll receive notifications of the activities of the museum whether it is related to the use of their card or any other exciting offers from the museum.

Title: KorEvv
App URL : https://apps.apple.com/us/app/korevv/id1468080415
Objective: With the cutting edge cloud-based solutions this app helps agency owners to communicate with their caregivers and patients more efficiently, resulting in better personal care services, real-time updates & reducing unnecessary expenses.

Title: Fastlane Member Kiosk (Only for iPad's)
App URL : https://apps.apple.com/au/app/member-fast-lane-kiosk/id1544979380
Objective: Fast Lane solution allows your members to gain quick entry without waiting with other visitors No need to staff additional person for members.
Fast Lane Kiosk is a solution on iPad affixed on counter/ stand. It comes with a companion iPad with Fast Lane for your staff. Member puts in couple pieces of info and their card to instantly show up on screen. At the same time, card also pops on Staff iPad instantly while they may be attending other people in general queue and staff can verbally acknowledge them in.
